2.1 ABSTRACT

November, 1990 marked the eleventh month of full-scale earthmoving activities and was the end of the 1st Operating Year of the Project. Backfill grade was achieved in SP-OP-35 utilizing the scraper fleet which then moved over into SP-OP-34. The first dump sloping work on the Jackpile side of the Site began on JP-WO-11 and some amounts of protore next to the terminus of the rail spur were cleared. The trucks continued hauling NP-PS-17 across the closed section of the new highway. The area of NP-PS-18 met the gamma radiation standards and is ready for shale cover. The cleanup of contaminated soils in the far west side of the South Paguate area also met the gamma radiation standard. Fencing continued around the old P-10 area. Reseeding of the Housing Area was done by month's end along with some test sites utilizing different seed mixtures and application techniques. Volume verifications from Tom Mann, Inc. were received to check against the LCC surveys.

2.2 PROGRESS MAP

The attached progress maps indicate the percentages of completion for areas where work is being performed.

2.3. Construction Photos

Figure 1. Last cut off the top of JP-WO-11.

Figure 2. Straw for reseeding at the housing area.

2.3. Construction Photos

Figure 3. Sloping to a 3:1 grade at the Jackpile -- JP-PS-15.

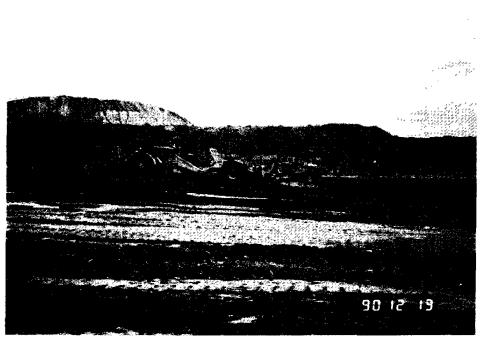

Figure 4. Scraping up contaminated material that was left after removing NP-PS-15.

2.3. Construction Photos

Figure 5. Parked scrapers at the end of a shift.

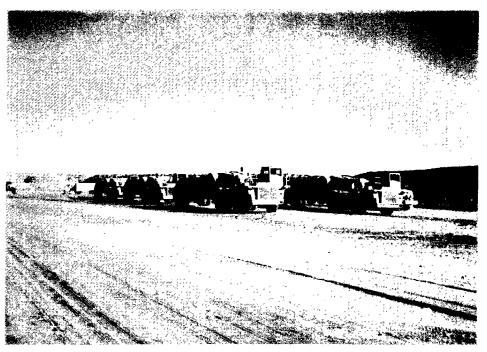

Figure 6. Parked trucks and 70-ton belly dump trailers.

2.4 MILESTONES

- The 1st Operating Year was completed 11/30/90;
- Final grade was achieved in SP-OP-35; the area is ready for soil cover;
- All water in SP-OP-34 is virtually gone; only remaining water is in the Jackpile Area;
- Sloping began in the Jackpile area on JP-WO-11;
- NP-PS-18, SP-CS-32/62 areas met the gamma radiation standards as verified by Eberline, Inc.
- The semi-annual surface and groundwater samples were taken by Re/Spec, Inc.
- Volumes from the aerial surveys were received and are begin checked along with the sloping profiles;
- BIA & BLM approved the 2nd Year Operating Plan and the revised P-10 closure plan, respectively;
- Ken King of the USGS began his research at Paguate Village in late November; BIA is funding his work;
- The 3rd Quarter Environmental Monitoring and Regulatory Compliance Report was distributed;
- The reseeding of the Housing Area was completed along with five other test plots;

3.0 ACTION ITEMS

3.1 POL/RPM

- 1) Submit Rio Moquino area design for BIA review
- 2) Hire & train two Reclamation Technicians
- 3) Prepare & submit 4th Quarter Financial Summary to BIA

3.2 BUREAU OF INDIAN AFFAIRS

- 1) Schedule Ken King-Paguate Blast Damage Study
- 2) Review and approve "Special Case" designs to be submitted by Roy F. Weston Engineering, Inc.

3.3 LANDMARK/WESTON

- 1) Submit Ed Kelley's Final Revegetation Recommendations
- 2) Finalize Rio Moquino area engineering design
- 3) Conduct/document final inspections when requested
- 4) Train Reclamation Technicians (pending hiring)
- 5) Check and reconcile volumes from latest aerial survey
- 6) Finalize Health & Safety Plan document update

3.4 LAGUNA CONSTRUCTION COMPANY

- 1) Submittal of work packages for inspection/closeout
- 2) Update schedule (as needed)

4.1 FOUR WEEK LOOK AHEAD

TIME LINE Gantt Chart Report, Strip 1, Page 1

4.2 PROJECT SCHEDULE

The truck fleet will continue hauling NP-PS-17 to the North Paguate Pit until January, 1991. The scraper fleet will continue backfilling SP-OP-34, and will also move the protore pile SP-PS-02 into this area. The dozer fleet will work on dump sloping in the west Jackpile area. Fencing continues as does the clean up of some contaminated soils around the Shop Area. Cleanup of the protore "hot spots" around NP-PS-13, 14, 15, and 16 will be addressed by the scraper fleet so these work packages can be closed. Dewatering of the Jackpile Pit will continue to supply the water for dust control.

5.1 TRACKING SUMMARY

Progress during November indicated an Estimated Variance at Completion of plus (+) \$3,321,543. This is \$333,382 improvement since the last report.

	1P1L01	POL Management	on-going;
	2M1X01	Highway Barricades	closed until 02/15/90 (latest estimate)
	2M3L02	Operator Training	on-going;
1	2E1N02	Haul NP-PS-17	on-going into January, 1991
- !	2E1N03	Haul NP-PS-18	completed; ready for shale cover
1	2E1N04	Haul NP-PS-14	substantially complete; need to clean "hot spots";
	2E1N05	Haul NP-PS-15	same as PS-14;
1	2E1N06	Haul NP-PS-16	boulders have to be hauled;
ı	2E1N07	Haul SP-PS-01	ready for shale cover in 2nd Year;
1	2E1N10	Haul NP-WT-10	pending North Paguate backfill;
	2E1N11	Haul NP-PS-13	same as PS-14;
	2E1S01	S. Paguate Roads	on-going with backfilling;
	2E2N04	Cut NP-WO-04	pending north pit backfilling;

5.2 WORK PACKAGE DISCUSSION (continued)

	WP#	DESCRIPTION	REMARKS
1	2E2S03,04	Cut S. Paguate Slope	using scrapers to 17, 18, 13B; obtain needed fill volume;
1	2E2S06	Cut SP-WS-18/19 slopes	substantially done
	2E4S01	Contaminate Soil Cleanup	some Paguate areas still in-progress;
=	2E5N01,02	Trim/scale Paguate highwalls	pending scheduling
-	2S2S01	Dewater South Paguate pit	substantially done
	2S5N02	NP fencing	on-going; to be combined with all other fencing work packages in Year 2
	2S1S04	Seal Vent Holes	two remaining in Jackpile area;
!	2S1S02	Scal P-10 decline	new plan approved by BLM & BIA; will be scheduled by LCC;
1	2S3S01	Demolish SP structures	four buildings remain pending POL Council action;
1	2S3J01	Demolish JP structures	substantially done
•	2E4S07	Cleanup CS-62/33	substantially done
-	2S2J01	Dewater Jackpile Pit	on-going for dust control purposes;
•	2E2J14	Cut slopes JP-WO-11	on-going thru spring, 1991;
CONFIDENTIAL	2R1S03	Reseed Housing Area	substantially done along with minor test plots;
CONFIDENTIAL			POL-EPA01-0003003

5.3 WORK PACKAGE CLOSEOUTS

1) Items submitted by LCC, Inc. for Final Inspection/Closeout:

NONE for November, 1990

2) Items submitted by Pueblo of Laguna to BIA for final closeout:

NONE for November, 1990

5.4 CHANGE ORDER SUMMARY

NONE for November, 1990

6.1 PERFORMANCE MEASUREMENT

The 1st Operating Year was completed with moving of an estimated 158% of the baseline volume and 31 weeks ahead-of-baseline rates based upon the excess volume-moved. Cash flows for the 1st Year (plus mobilization) are tracking as expected with adequate cash reserves available for the 2nd Year.

7.0

 - Monthly Inspection Summary-November, 1990
- 2) Sid Vogelpohl-BLM memo to Allen J. Sedik, P.E.-BIA Project Engineer: Approval of Revised P-10 Closure Plan- November 28, 1990;

LANDMARK RECLAMATION

DATE:

December 11, 1990

TO:

∥Jim Olsen. Jr., P.E. - Reclamation Project Manager

FROM: Jim Harrison, Engineering Services

RE: 1

Inspection Report, Month of November, 1990 -- Jackpile Reclamtion Project.

Except for the first week the weather was easy: sunny but cool. At the beginning of the month we witnessed the first frost and the first snow.

The results of the ground gamma surveys gave readings below the requirements for remediation. This was for NP-PS-18, after removal of the pile, and for SP-CS-62, where the top three to four feet was scraped off. With readings less than 10 time background, the area formerly occupied by NP-PS-18 is ready for shale cover as is the former road, SP-CS-62, where readings were less than two times background.

Work is nearly complete backfilling OP-35. The slopes of SP-WS-18C and SP-WT-19, that provided material for the pit, check out at 3:1. Berms were placed on SP-WT-19, but not SP-WS-18C. The pit elevation is at the required 6058 feet.

Likewise, work was completed doing slooing work on the other South Paguate dumps. Dozers pushed over the berms that made the ponds in the SP-WO-10/13 area.

Memorandum

To: Assistant Area Manager (Programs)

Attn: Allen J. Sedik

From: ADM, Mineral Resources

Subject: Closure Plan P-10 Decline

We have reviewed the proposed closure plan for the P-10 decline and find that the proposed method is based on sound engineering logic and will meet the requirements of the R.O.D. Several design features were mentioned in this plan but were not adequately discussed.

Two features need further discussion. The first is the construction of the dirt stockpile over the area of possible subsidence. A map showing the size and location of this should be included along with the estimate of material needed. The second feature needing further discussion is the channeling of the Oak Canyon drainage across the decline. Additionally, the cost to construct these two features should be included in the work package.

The final area needing discussion is the projected maintenance for this work. As subsidence continues the dirt stock pile will have to be monitored and repaired along with the channel for the Oak Canyon drainage.

Thank you for the opportunity to review this plan. If further information is needed please contact David R. Sitzler at 761-4619.
